SKILLS PROFILE

Certification: FET: Information Technology

Certification: Paralegal Practitioner

Certification: Full Stack Development

FULL-STACK DEVELOPMENT PROJECTS

Project: ModernTech HR System (Frontend) | December 2025

- Developed a frontend HR system to manage and view employee information in a structured and user-friendly interface.
- Used HTML5, CSS3, and JavaScript to build a responsive layout with clean navigation and accessible design.
- Refined the interface through testing and feedback to improve usability and overall user experience.

Project: ModernTech HR System (Backend) | January 2026

- Built the backend for an HR system to handle employee data, records, and basic HR operations through structured APIs.
- Used server-side JavaScript (Node.js) and a database to store, retrieve, and manage HR information efficiently.
- Designed and tested API endpoints to ensure reliable data flow between the frontend and backend systems.

Project: Ecommerce: Arc Travel | February 2026

Worked in a team to develop a full-stack ecommerce application focused on travel-related products.

- Developed backend functionality using Node.js, and MySQL to manage product data and application processes.
- Built responsive and user-friendly front-end components using JavaScript based on project requirements.
- Contributed to features such as product listings and order handling.
- Participated in testing and presentations, using feedback to improve the application.

PROFESSIONAL EXPERIENCE

Autism Connect, Strandfontein, Cape Town
Admin Assistant January 2023 – September 2023

- Handled general office administration including filing, document organisation, and maintaining records.
- Typed up meeting minutes from handwritten or recorded notes for accurate documentation.
- Managed incoming phone calls and assisted with daily communication and enquiries.
- Prepared and sent documents such as proof of payments and other administrative correspondence.

Complete IT Business Solutions, Sunningdale, Cape Town
Intern / Entry-Level Desktop Technician October 2023 – September 2025

- Logged and updated support tickets, tracking issues through to resolution using internal ticketing systems.
- Provided remote support to users, assisting with basic software, system, and access-related issues.
- Supported Microsoft environments by assisting with user accounts, applications, and general troubleshooting.
- Performed basic system and network-related tasks under supervision, including simple server and firewall support.
- Assisted with reporting by documenting issues, solutions, and daily IT support activities.
